

Extend Your Capabilities.

Most hospital business offices lack the time, staff resources and technology to handle heavy A/R volumes or hard-to-resolve claims. We offer a solution.

We can serve as a seamless extension of your business office through a sophisticated Virtual Private Network (VPN) or interface that permits a real-time, two-way flow of relevant patient account data between your hospital and our system. Our highly trained and experienced (and **100% “on-shore”**) revenue cycle professionals can handle your accounts receivable expertly, in ways that create important advantages for you:

- ▶ Improved cash flow
- ▶ Reduced bad debt expense and reliance on collection agencies
- ▶ Faster claims resolution
- ▶ Enhanced staffing flexibility
- ▶ Consistent flow of information through weekly conference calls and management reports and account activity data visible in your system

By helping you collect greater revenues at lower costs, our services complement your resources to offer you a long-term revenue cycle management strategy.
