

Accelerate Results Right Away and for the Long Term

Like no one else in our field, Xtend can send an entire team of revenue cycle professionals to your location. It's an intensive, comprehensive service that our management team has refined and mastered over the past three decades. And it can be a lifesaver for facilities that:

- ▶ Need immediate cash flow improvement
- ▶ Have a large volume of aging or difficult-to-resolve receivables
- ▶ Are transitioning to new IT or billing systems or a new facility
- ▶ Need training on best-practice solutions for their revenue cycle team
- ▶ Require a customized solution that includes more than just an A/R clean up

Working closely with your own staff, our experts will get on the job quickly and stay as long as it takes. Not only will they handle claims, our team will implement improvements and help train your personnel — and offer you the benefit of our sophisticated data systems for managing your A/R inventory and assessing the status of all claims automatically — so that backlogs don't recur and your own team can optimize revenue cycle management going forward.
